Promote Peaceful and Inclusive Societies for Sustainable Development, Provide Access to Justice for All, and Build Effective, Accountable, and Inclusive Institutions at All Levels

16.3.1 Provide expert advice to government

Our university actively fulfills its role as a key partner in governance by providing robust, evidence-based support to government bodies at all levels. This commitment is realized through the direct provision of expert advice to policymakers, the delivery of specialized capacity-building programs for lawmakers, and active participation in government-commissioned research.

On the national level, university staff members' serve as expert advisors to governmental and non-governmental organizations, providing strategic counsel on critical areas including education, research, health promotion, quality assurance, and community development.

Misr International University provides specific expert advice to national government on pharmacy education policy. In May 2025, the Faculty of Pharmacy served as a Strategic Partner in the 9th Arab International Pharmacy Conference (AIPC 2025) and organized a policy-focused panel discussion entitled "Towards Competency-Based Pharmacy Education and Assessment: Year 6 Internship and Licensure Exam Frameworks." The panel brought together Prof. Dr. Abdel Nasser Singab, Head of the Pharmacy Sector at the Supreme Council of Universities, and Deans of Pharmacy Faculties. MIU faculty contributed expert analysis and recommendations on the implementation of Year 6 experiential training and the National Licensure Exam, directly informing national regulatory stakeholders.
