Misr International University

Times Higher Education Impact Rating

SDG 4 – Quality Education focuses on ensuring equitable access to education and providing lifelong learning opportunities for everyone. At Misr International University (MIU), this goal guides our commitment to preparing qualified graduates and educators. It also reflects our role in sharing knowledge with society and expanding learning opportunities beyond the campus, so that education reaches students, professionals, and the wider community. Through inclusive and accessible practices, MIU works to remove barriers to learning and ensure that everyone has a fair chance to benefit from education. Through these efforts, the university aims to support the development of its students and the community around it.

4 QUALITY EDUCATION

Ensure Inclusive and Equitable Quality Education and Promote Lifelong Learning Opportunities for All

4.2.1: *Preparing Qualified Future Teachers*

The Faculty of Applied Linguistics (Al-Alsun) prepares **future English-language teachers** through a strong academic foundation, pedagogical knowledge, and practical teaching skills. Its curriculum and educational activities, including **TEFL training**, classroom observation, co-teaching, field experiences, and technology-enhanced learning, equip students with the linguistic proficiency, instructional skills, and professional competencies needed to pursue teaching careers. Accordingly, all graduates possess the knowledge required for English-language teaching, while the faculty's pedagogical training and practical experience strengthen their readiness to undertake teaching responsibilities.

During the academic year **2024–2025**, **98 students graduated** from the Faculty of Applied Linguistics (Al-Alsun), representing the faculty's contribution to preparing future English-language educators.

Proportion of graduates with relevant qualification for teaching [2024-2025]

98	98	100%

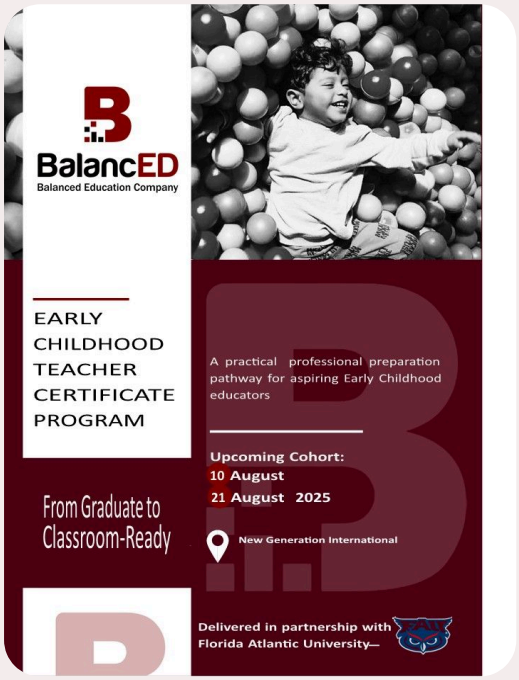
Industry Training

Al-Ahram, Arabize & MENA translation training

1. TEFL: New Generation

TEFL training prepares future teachers through hands-on classroom experience in lesson planning, assessment, and student engagement, translating educational theory into effective teaching practices.



Future Educators Trained at New Generation International Schools

As part of teacher-training program at the Faculty of Applied Linguistics (Al-Alsun), New Generation International Schools hosted **8 senior students** for a teaching internship from August 10–21, 2025. Participants gained practical experience in lesson planning, assessment, and student engagement, combining educational theory with classroom application. The internship prepared them for certified teaching careers, with credentials issued by Florida Atlantic University (FAU) and BalancedEd, fostering confident and qualified future educators.

Read more

2. Graduation Projects **Empowering Future Educators

The Faculty of Applied Linguistics (Al-Alsun) Fall 2024 Graduation Projects aimed to strengthen pedagogical skills, promote effective language-teaching strategies, and explore how emerging technologies can make education more engaging, inclusive, and responsive to learners' needs. Through designing interactive curricula, lesson plans, and engaging learning activities, and exploring the linguistic and cultural dimensions of Modern Egyptian Arabic for bilingual speakers, graduation project groups worked on creating websites and textbooks.

Engagement with AI-generated suggestions provided opportunities for critical evaluation, particularly regarding linguistic accuracy, and cultural relevance.

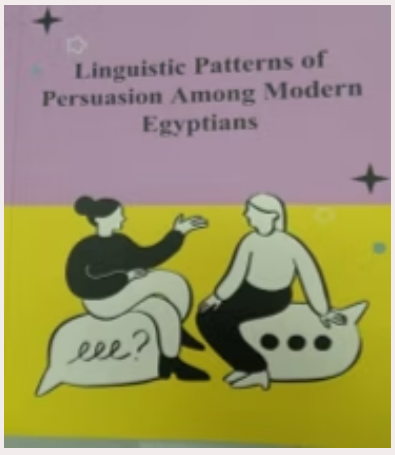
Morphosyntax Mastery – Sample project

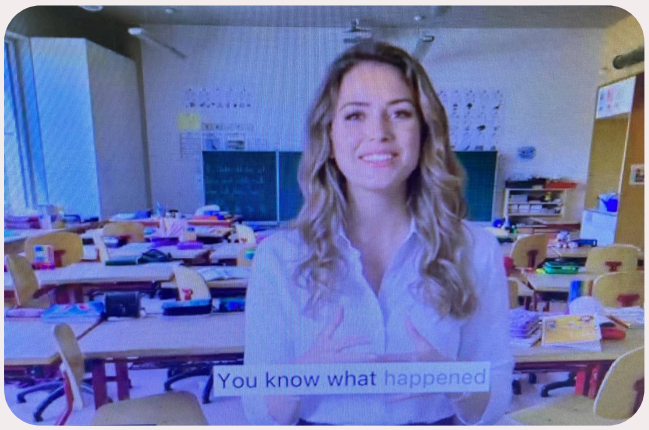


2.2 Designing the AI-Powered TEFL Educator

The Fall 2025 Graduation Project of the Faculty of Applied Linguistics (Al-Alsun) engages student teachers in exploring the theme “AI Production of the Perfect Instructor: A Student-Centered Perspective.” Through group research, students research the qualities of an ideal educator and turn their findings into AI avatars.

From a TEFL (Teaching English as a Foreign Language) perspective, the project directly trains future language teachers to design, edit, and deliver effective English lesson plans for diverse learner profiles. By programming AI avatars to use specific paralinguistic cues, such as intonation, voice synthesis, and body language, students learn how to maximize engagement and optimize foreign language acquisition.

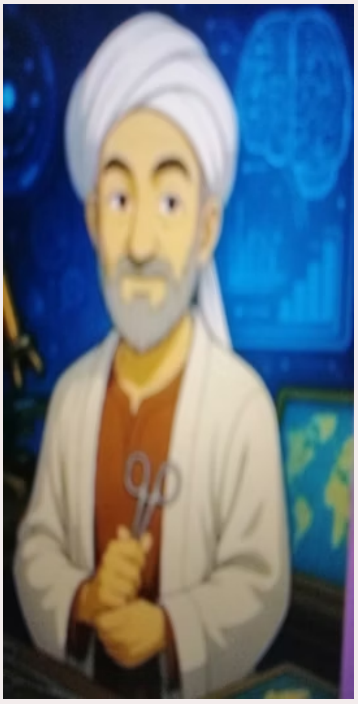
Read more



2.3 Arab Scientists Who Taught the World

The Spring 2025 Graduation Project of the Faculty of Applied Linguistics (Al-Alsun) entitled “Arab Scientists Who Taught the World” aimed to highlight the scientific contributions of prominent Arab scholars. The project had a clear educational rationale, as it sought to enrich students’ cultural and historical knowledge, promote appreciation of scientific achievements, and strengthen their research, presentation, and communication skills. Furthermore, the project aimed to prepare student teachers for their future professional roles in Teaching English as a Foreign Language (TEFL) by equipping them with practical experience in designing Content-Based Instruction (CBI) materials, integrating cross-curricular themes into language lessons, and adapting modern technological tools for classroom instruction.

Read more



3. Technology-Enhanced Learning

The integration of educational technology into teaching and learning contributes to preparing successful teachers by developing digital competencies, pedagogical creativity, adaptability, and the ability to employ innovative tools to engage diverse learners. Through the course of **Writing for Digital Media**, students explored immersive learning experiences via **Virtual Reality (VR)**, while the course of **Postmodern Literature** incorporated **VR-based learning activities** to enhance literary engagement and experiential understanding. **Augmented Reality (AR)** introduced students to Henrik Ibsen's world through interactive literary exploration, enriching their understanding of drama and demonstrating innovative approaches to teaching literary texts.

Furthermore, in their Phonetics in Practice course, **first-year students used VR to enhance speech practice**, developing their oral communication skills and gaining exposure to technology-supported language learning. Artificial intelligence was further explored through **AI learning activities**, highlighting its emerging role in transforming educational practices and academic engagement.

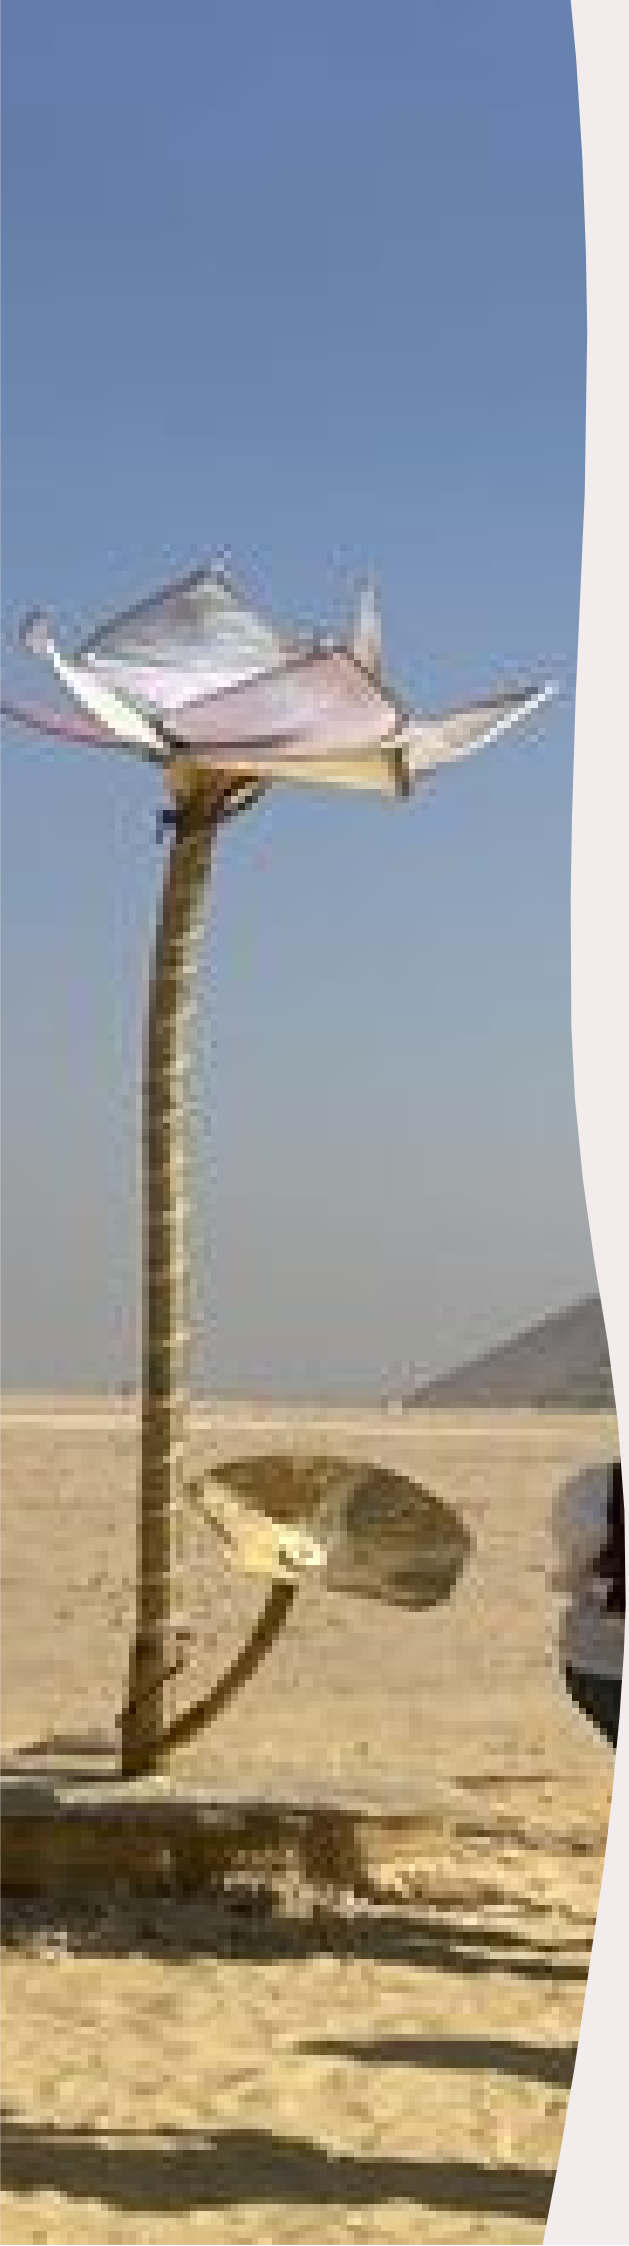
4. Workshops and Sessions

Professional development initiatives further strengthen technology-informed teacher preparation by exposing students and faculty to emerging educational technologies and innovative pedagogical practices. The **MIU–DAAD workshop entitled "AI in Higher Education"**, held on December 9, 2024, explored the role of artificial intelligence in higher education. Additionally, the **"AI Language Learning" workshop**, held as part of the **"AI for Sustainable Future" conference** on May 5, 2025, highlighted AI applications in language learning and teaching. These initiatives complement the **AI session, "AI-Alsun Leaps into the Future with Artificial Intelligence"**, held on April 28, 2025, by promoting awareness of AI-driven educational opportunities and encouraging innovative instructional approaches.

MIU-DAAD Workshop

AI Language Learning Workshop

AI Session



5. Field Trips

Experiential learning activities prepare future teachers by developing cultural awareness, analytical thinking, interdisciplinary knowledge, and the ability to connect academic concepts with real-world contexts. Through the course of **Digital Media**, students explored the historical and cultural richness of **Al-Moez Street in Old Cairo**, while **Introduction to Conference Interpretation** connected interpreting practices with contemporary artistic expression through the **Forever Is Now exhibition at the Giza Pyramids**. Moreover, the **National Museum of Egyptian Civilization (NMEC)** offered students in the course of **Postmodern Literature** opportunities to examine historical narratives, cultural representation, and heritage. Meanwhile, the course of **Sociolinguistics** incorporated films and **cinema-based learning** to examine linguistic variation, communication, and social interaction in authentic audiovisual contexts.

Forever is Now Exhibition

NMEC

6. Industry Training

Specialized translation training also contributes to teacher preparation by strengthening students' linguistic accuracy, intercultural competence, and ability to explain language structures and translation strategies, enriching their future language teaching practices.

1. Journalistic Translation at Al-Ahram

Seventeen students completed specialized training at Al-Ahram Regional Institute for Journalism, practicing news translation under Managing Editor Hany Asal. Realistic newsroom exercises strengthened their Arabic–English translation skills and professional readiness.

4 QUALITY EDUCATION

Ensure Inclusive and Equitable Quality Education and Promote Lifelong Learning Opportunities for All

4.3.1 – *Public Resources*

Free Access to educational resources

Public Access to Knowledge and Expertise

MIU facilitates **public access** to scholarly knowledge and professional expertise through open-access journals, academic conferences and summits, and health awareness campaigns. These initiatives promote knowledge-sharing and connect research and specialized expertise with academic, professional, and community audiences. Participation in these activities and access to their knowledge-sharing opportunities are open to the public, extending their benefits beyond the university community.

4 QUALITY EDUCATION

Ensure Inclusive and Equitable Quality Education and Promote Lifelong Learning Opportunities for All

Free access to research journals

During the 2024–2025 academic year, MIU continued to support **public access** to scholarly **educational resources** through its two open-access journals, JFCR and JOCC. JFCR published three issues (December 2024, June 2025 and December 2025), and JOCC published two (February and July 2025). JFCR and JOCC give **free online access** to anyone. Both still accept submissions, so knowledge keeps spreading across health sciences and computing.

JFCR · JOCC

Access to technical training and expertise

In June 2025, the Continuing Education Center launched its second round of technical courses with Cisco Networking Academy, Red Hat Academy, Huawei Academy and IBM SkillsBuild, covering networking, cybersecurity, AI, embedded systems and software testing with **certification pathways**. By **engaging the community**, the courses are open to current students, recent graduates and working professionals, extending access to specialized learning and professional development.

CEC second round

Conferences and summits open to outside audiences

MIU opened knowledge-sharing opportunities to external audiences through conferences and summits addressing **sustainable development**, emerging technologies, and professional practices across disciplines.

Lifelong Learning and Continuing Education (continued)

8. Network: CCNA (200-301) Course

The hybrid CCNA course provides **flexible technical learning** through online and on-campus instruction. It enables learners to enhance **networking competencies**, pursue **professional certification**, and continue developing **employment-relevant skills**.

4.3.5: *Lifelong Learning Access Policy*

Ensuring Equal Access to Education for All

The following examples highlight MIU's commitment to ensuring *equal* accessibility to lifelong learning:

MIU's Policy on Equality and Non-Discrimination

Haleon's Educational Sessions

Oral Health Awareness Campaign at the MIU Dental Clinic Complex

1. MIU's Policy on Equality and Non-Discrimination

MIU maintains inclusive policies ensuring equal access to education, training, and lifelong learning activities. The policy affirms the university's dedication to justice, equal opportunity, and full inclusion across all academic and administrative practices. It prohibits discrimination based on **gender, race, religion, or social background**, and ensures:

Transparent Recruitment and Evaluation

Equal Access to Admissions and Support

Protection Against Discrimination & Harassment

Complaint-Handling Mechanisms

2. Haleon's Educational Sessions

MIU's Faculty of Pharmacy participated in Haleon's global World Pharmacists Day 2025 activities, providing **89 pharmacy students** with access to virtual educational sessions delivered by **international experts**. The initiative expanded learning opportunities beyond conventional classroom instruction, facilitated knowledge exchange, and supported continuous professional learning in patient care, self-care, and community wellness.

3. Oral Health Awareness Campaign at the MIU Dental Clinic Complex

27 August 2025

MIU's Faculty of Oral and Dental Medicine organized an **oral health awareness campaign** providing patients attending the university's Dental Clinic Complex with educational guidance on oral diseases and proper hygiene practices. Through **supervised educational interactions**, the campaign promoted access to health knowledge and supported continuous learning and awareness among community members.
