SDG 11

Indicator 11.4.7

Local Authority Collaboration Regarding Planning and Development

The Faculty of Engineering Sciences and Arts at Misr International University enhances the scientific and practical role of its two academic departments, Architecture and Communications, and maximizes the university's role in serving the community and its surrounding area as well as communities outside the university's geographical scope.

Communication and Interaction

Ismailia City Field Trip:

On February 5th, 2024, fifth-year Architecture students went on a site visit to Ismailia city for their graduation project. They are working on creating a specialized museum & media center.

Students visited the Suez Canal and immersed themselves in the rich tapestry of Ismailia's landscape, history, and culture. They also visited the Ismailia Monuments Museum where they gained a deeper understanding of the city's architectural heritage and cultural significance. The faculty would like to express its sincere gratitude to the graduation staff for their unwavering support and guidance.

Local producers gain access to campus customers

On 19 February 2025, MIU's Faculty of Pharmacy worked with the Directorate of Social Affairs and the Egyptian Red Crescent to organize a bazaar for local producers. Families and small producers displayed handmade goods and food and could sell directly to campus customers. The register identifies the partners and the sales opportunity, but gives no figures for attendance, sales or household income.

The event supported local economic participation by giving producers access to a market. MIU records it under indicator 1.4.1. For 11.4.7, it demonstrates a working relationship with a public directorate; the documented joint activity was organizing the bazaar.

Student Activities

The student club "ASCC For Help" held several events inside and outside the university during the semester, under the supervision of Dr. Mohamed El Sawy, Vice Dean of the Faculty of Engineering for Community Service and Environmental Affairs.

1. Case Study and Winter Exhibition:

- More than 150 houses in Yousef El Seddeek village, Fayoum, were studied on 24/11/2023.
- The study revealed that the most in-need categories require assistance in:
    - **Housing:** Building roofs, wall restoration, providing winter blankets.
    - **Clothing:** Clothes for children's schools, winter exhibition, summer exhibition.
    - **Health:** The group most affected by asthma and disc problems.

- **Awareness:** Campaigns on the harms of child marriage, teeth cleaning, and wearing shoes.
- **Food:** Distribution of Ramadan bags, daily meals, and meat.

- A plan was implemented starting with a winter clothes exhibition, where more than 100 pieces of clothing were distributed at the beginning of the academic year, on 24/11/2023.

2. Blanket Distribution:

- 250 blankets were distributed in Salem Gad village, Fayoum, on 22-12-2023, based on the case study and donations.

3. Distribution of External Textbooks for Children in a Shelter:

- Donations were collected to purchase external textbooks for the children of Dar Al-Huda Al-Islami (shelter) at the beginning of the academic year on 22-11-2023.
