Misr International University Report

Sustainability Impact Ratings

SDG 12:

Responsible Consumption and Production

Our commitment to SDG 12 (Responsible Consumption and Production) is demonstrated by embedding sustainable consumption and production principles across our institution. We stand up for the practical application of resource efficiency, moving beyond research to transform our campus operations through advanced waste recycling and sustainable procurement. This report details our systematic efforts in waste management and fostering sustainable supply chains, initiatives that solidify our leadership in sustainability and enhance our performance in global rankings.

12.3.1. Proportion of Recycled Waste

The university maintains a comprehensive **Waste Management Policy** that governs the safe handling and disposal of all waste streams, including hazardous materials, and mandates the systematic tracking and reporting of amounts sent to landfill and recycling.

In 2024/2025, the total amount of waste was **244.7 metric tons including 56 metric tons for recycling and 188.7 metric tons for sending to landfills.**
