

## Strengthen the Means of Implementation and Revitalize the Global Partnership for Sustainable Development

### 17.2.2

#### Cross sectoral dialogue about SDGs:

MIU actively promotes cross-sectoral dialogue and international knowledge exchange to advance the Sustainable Development Goals (SDGs). Through its [First Conference on the Sustainable Development Goals 2030](#), the university created an interdisciplinary platform where students, faculty, and external partners engaged in discussions on global challenges and sustainable solutions. This event enabled the gathering of diverse perspectives and data from different disciplines—supporting evidence-based approaches to SDG implementation and aligning with international practices of multi-stakeholder engagement.

Furthermore, MIU's collaboration with [Al-Fanar Media](#) on a media literacy workshop strengthened cross-sectoral interaction between academia and the media industry. By addressing digital misinformation, critical content analysis, and responsible communication. This model mirrors global best practice, where universities partner with media organizations to enhance societal resilience against misinformation and promote informed public discourse.
