

Achieve Gender Equality and Empower All Women and Girls

5.3.1 T*racking Women's Application Rate, Acceptance or Entry*

MIU monitors women's representation throughout the university journey, from application and completion of admission requirements to enrollment. During 2024–2025, female representation increased across these stages, from **55.3%** of **applicants** to **57.9%** of students who completed the **admission tests**, and **59.7%** of **enrolled students**.

Enrollment at a glance: 2023-2024 vs 2024-2025

1

Female students

681 → 1,279 (+598, +87.8%)

2

Male students

498 → 862 (+364, +73.1%)

3

Total students

1,179 → 2,141 (+962, +81.6%)

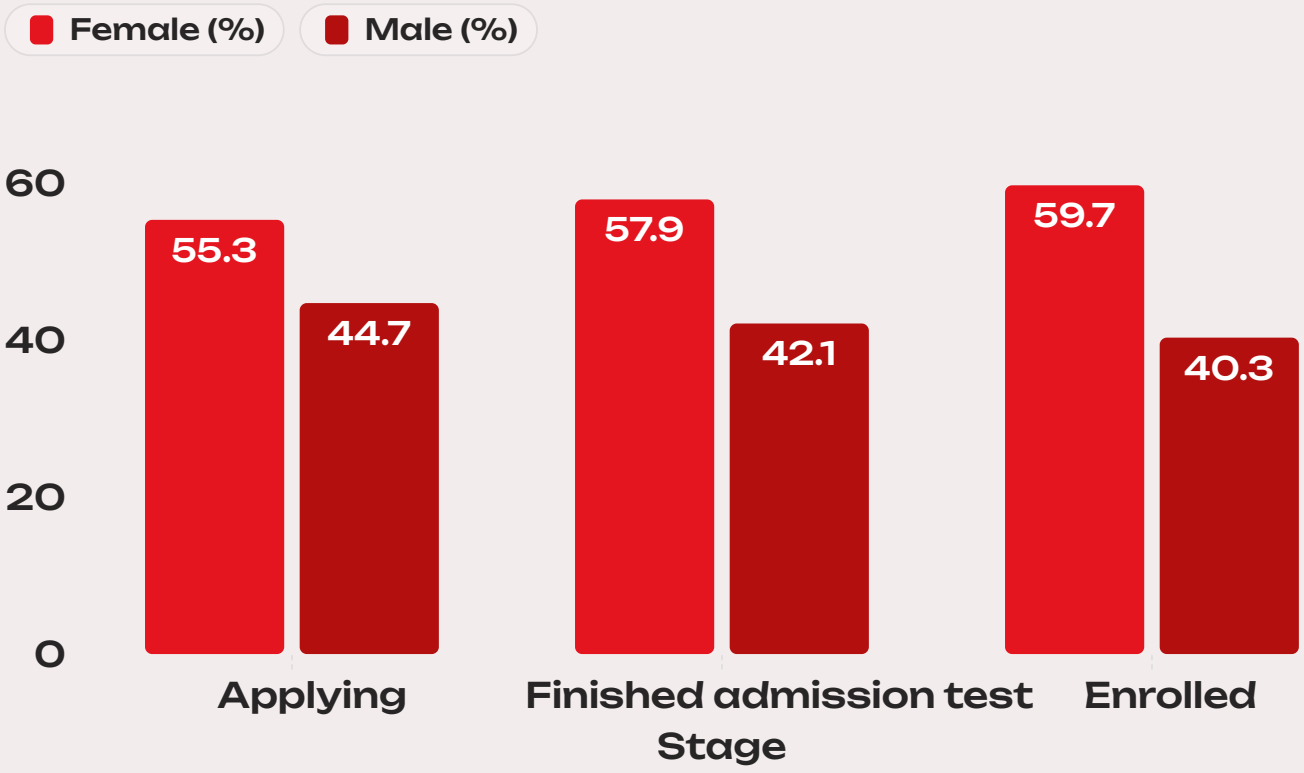
4

Female representation

57.8% → 59.7% (+2.0 percentage points)

Chart 1. Women's Representation Across the Admission Process, 2024–2025

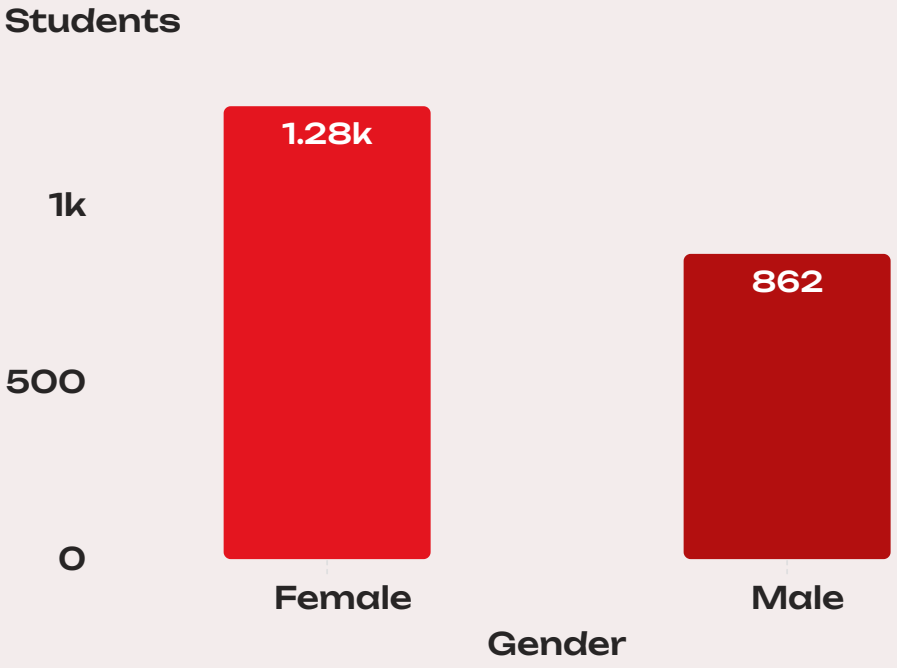
The chart below shows the share of women and men among **applicants**, students who completed the **admission tests**, and **enrolled students** in 2024–2025.



Female representation rises at each stage of the **admission process**, from **55.3%** of **applicants** to **57.9%** of those who finished the **admission test** and **59.7%** of **enrolled students**, while male share falls from 44.7% to 40.3%. This is a gain of 4.4 percentage points between application and enrollment, suggesting women are more likely to complete the admission steps and enroll.

Chart 2. Student Enrollment by Gender

Student enrollment, 2024-2025



Female
+87.8%

Male
+73.1%

Female enrollment grew faster than male enrollment.

Total enrollment: 2,141 students in 2024–2025.

Comparison: 2023-2024 vs 2024-2025

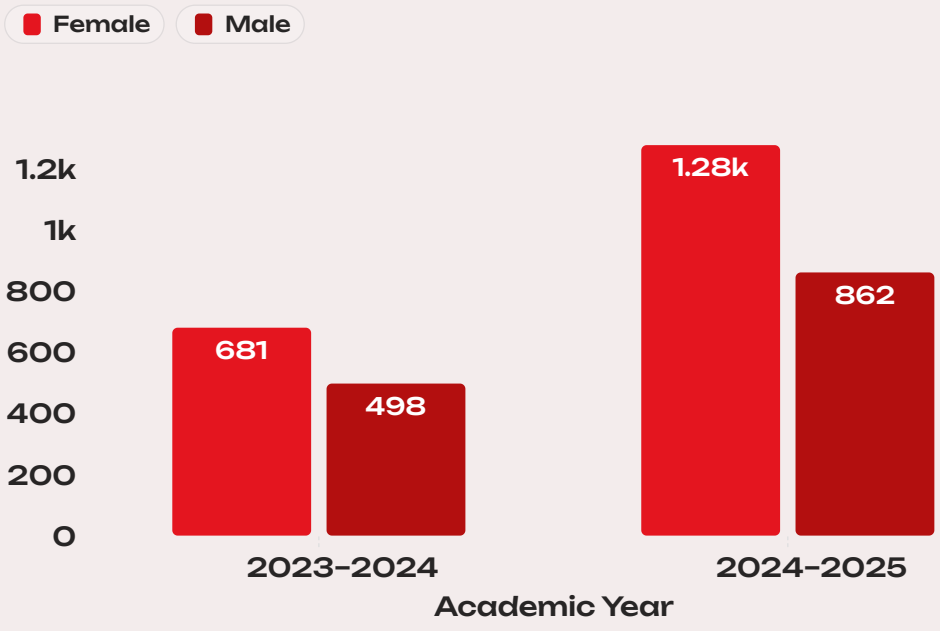


Chart 3. Growth in Female and Male Representation

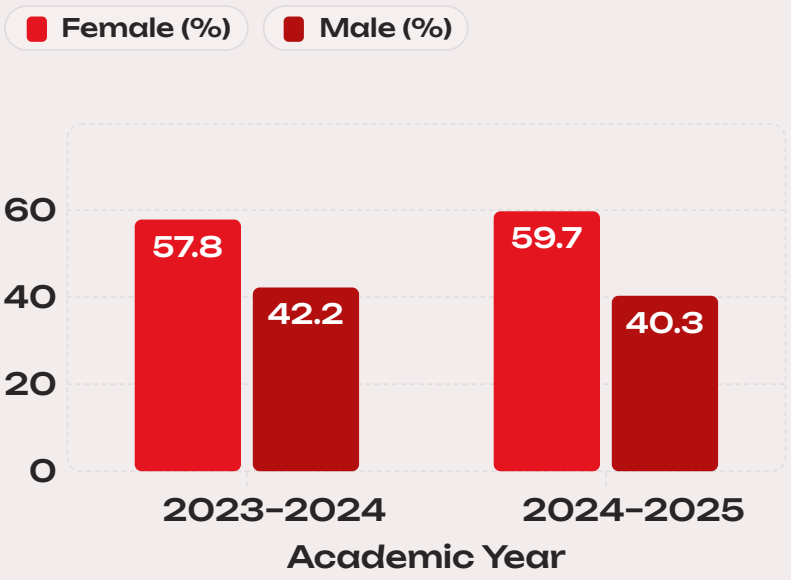
Share of female and male students in total enrollment (%)



+2.0 percentage points

Female representation rose from 57.8% to 59.7%, while male representation moved from 42.2% to 40.3%.

Key findings

1. **Faster growth**

   Female enrollment grew faster than male enrollment (87.8% vs 73.1%).

2. **Higher representation**

   Female representation increased from 57.8% to 59.7%.

3. **Progression**

   Women make up 60.6% of selected final-year cohorts: 661 female vs 429 male.

4. **Broad-based progress**

   Female enrollment increased in most faculties.
