6.5.5

Cooperation On Water Security

Misr international University (MIU) has an active engagement in supporting national and regional government goals regarding water security. Through the Faculty of Al-Asun and Mass Communication, the University acts as a vital research partner, providing data-driven insights into public sentiment and evaluating the efficacy of national awareness campaigns.

The data presented below demonstrates how the University contributes to **Goal 6 (Clean Water and Sanitation)** by aligning academic research with the Egyptian government’s national strategy for the **rationalization of water consumption**.

The integration of these academic outputs can support the government in the following ways:

Research Output	Government Application
Comparative Study (TV vs. Social Media)	Helps the Ministry of Water Resources and Irrigation decide where to place ads for maximum impact.
Public Attitude Surveys	Provides demographic data on which segments of the population are least likely to conserve water, allowing for targeted policy interventions.

<p>Awareness Analysis</p>	<p>Validates the effectiveness of current "Water Rationalization" (Trsheed) initiatives.</p>
<p>Fieldwork and Data Collection: Monitoring Public Sentiment</p>	<p><i>Context: Integrating community surveying into curriculum.</i></p> <p>As part of the practical requirements for the "Introduction to Research Methods" course, undergraduate students from the Media Department engaged directly with the local community.</p> <ul style="list-style-type: none"> • The Activity: Students distributed public opinion surveys to a diverse sample of Egyptian citizens. • The Focus: The surveys were designed to gauge "Egyptians' attitudes toward water consumption." • Off-Campus Impact: By taking these surveys outside the classroom and into the general population, the university achieved two goals: gathering data on real-world public behavior and subtly raising awareness among respondents regarding the urgency of water issues. <p>https://www.miuegypt.edu.eg/mass-communication-students-visit-verynile-to-raise-environmental-awareness/</p> <p>https://www.miuegypt.edu.eg/als-mcm-visits-fatma-al-zahraa-orphanage/</p>
<p>Advanced Graduate Research: Evaluating National Awareness Campaigns</p>	<p><i>Context: Master's level contribution to national sustainability strategies.</i></p> <p>The Faculty of Al-Asun and Mass Media (Mass Communication Department) continues to support high-level research dedicated to solving national environmental challenges.</p> <ul style="list-style-type: none"> • The Event: A master's Thesis defense held on Thursday, June 6, 2024. • The Thesis Title: "<i>The Impact of Media Awareness Messages on Egyptians' Attitudes Towards Water Rationalization: A Comparative Study between Television and Social Media Platforms.</i>" • Off-Campus Impact: This research directly addresses how to effectively communicate water conservation to the public. By analyzing Television and

Social Media—the two primary channels for reaching the masses—this study provides actionable data on how to convince the Egyptian population to rationalize water use.
